GitHub Copilot

Your AI Pair Programmer

Trained on billions of lines of code, GitHub Copilot turns natural language prompts into coding suggestions across dozens of languages.

Start using Copilot Free or try Copilot Pro

```
1 import urllib.request, json
2
3 def get_repositories(org):
4     """List all names of GitHub repositories for
5     org"""
6     url = "https://api.github.com/orgs/%s/repos" % org
7     request = urllib.request.Request(url)
8     response = urllib.request.urlopen(request)
9     data = json.loads(response.read().decode())
10    return [repo['name'] for repo in data]
```

클릭

Visibility

Show Copilot

Enabled

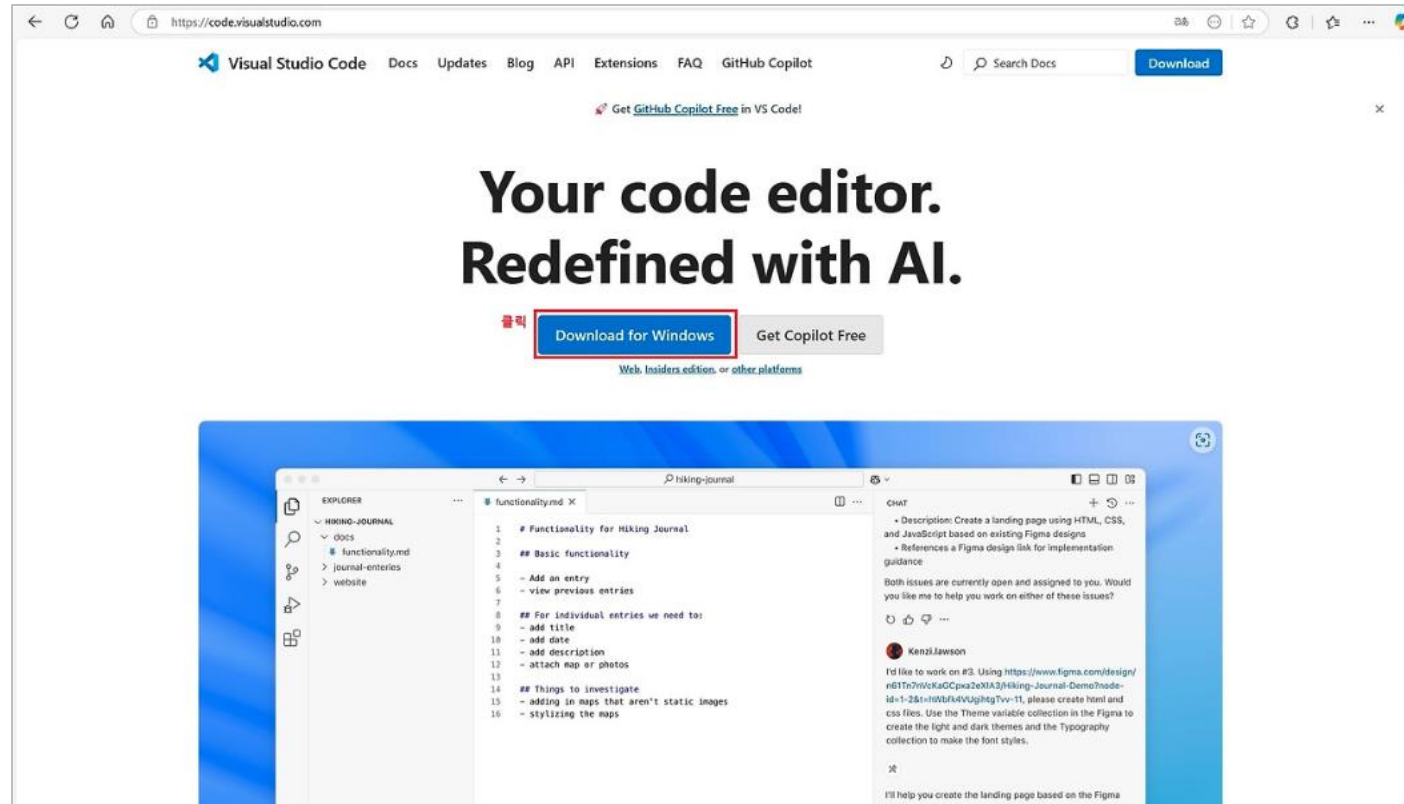

Enable Copilot for all GitHub features, including navigation bar, search, and dashboard. When disabled, Copilot will be hidden and unavailable. This setting does not apply to Copilot search on GitHub Docs.

Visual Studio Code documentation

Get familiar with Visual Studio Code and learn how to code faster with AI.

Getting started

Set up Visual Studio Code

Follow the setup guide to install and configure VS Code for your OS.

Getting started

Discover the key features of VS Code with the step-by-step tutorial.

Code faster with AI

Get started with GitHub Copilot, your AI coding assistant.

Code with rich features

Code in any language

Write code in your favorite programming language.

Version control

Built-in support for git and many other source control providers.

Debugging

Debug your code without leaving your editor.

GitHub Copilot

Your AI pair programmer to write code faster and smarter

• Chat about your code

• Make changes using natural language

• AI-suggested code completions

• Use natural language in your files

Sometimes, it's easier to describe the code you want to write directly within a file.

Place your cursor or make a selection and use **Ctrl+I** to open **Inline Chat**.

• Look out for smart actions
